Period – Contemporary Art

Word	Definition
Perspective	Perspective in art refers to the representation of three-dimensional objects or spaces in two-dimensional artworks. Artists use perspective techniques to create a realistic impression of depth, 'play with' perspective to present dramatic or disorientating images.
Horizon	In a drawing or painting, the horizon line is the point where the earth meets the sky. It is always at eye-level—no more and no less.
Composition	Composition is the term given to a complete work of art and, more specifically, to the way in which all its elements work together to produce an overall effect.
Contrasting colours	It is one of the principles of art, which refers to the striking difference between two elements. For example, there is a strong contrast when you place a vivid red next to a dull green, or a rough texture next to a smooth texture, or a hard edge next to a soft edge.

How to Create Strong Contrast

Some colours may be bright and show up vibrantly on a particular background colour, such as blue on black, but they are poor contrast choices.
